Professional Experience — Total Experience: 07 Years 00 Months

Docusign, Data Scientist (Contract) — *Sep 2025 – present*

- Architected a **multi-agent RAG framework** using **CrewAI**, **FastAPI**, and LiteLLM API to automate end-to-end test case generation from **Jira** user stories; implemented hybrid RAG search with **Azure AI Search** achieving high-fidelity testcases across multiple business verticals
- Developed cloud-native backend leveraging **AWS** and web frontend using **NextJS/ReactJS** for seamless test case management and review; implemented bidirectional synchronization with **Jira Zephyr Scale** and Google Sheets API, reducing manual QA lifecycle cycle time by 60%

Ernst & Young LLP, Senior Consultant — *Nov 2024 – Sep 2025*

Citibank — **(Feb 2025 – Sep 2025)**

- Engineered **GenAI**-driven regulatory control transformation pipeline to automate control upliftment and mapping at Citibank using **Vertex AI**; implemented **human-in-the-loop** and **PII** validation workflows, similarity search with **FAISS** improving compliance accuracy by **30%**
- Developed a RAG-based **report automation framework** for qualitative/quantitative risk models using Python, LlamaIndex, and **prompt engineering** for data preprocessing and generate standardized validation sections for **50%** faster report generation

American Express — **(Nov 2024 – Jan 2025)**

- Developed **customer spend** and **behavioral classification** models using GBM **(Python, XGBoost)**, contributing to **marketing mix** optimization efforts and risk-adjusted targeting strategies.
- Built proof-of-concept (PoC) for a **Customer Support Agent** using **LangGraph** and **RAG** frameworks to securely query customer complaint mails from **MongoDB**, categorize, generate response, validate and respond to the same

Brane Enterprises, Solution Leader — *Apr 2024 – Sep 2024*

- Developed a **Langgraph ReACT** agent-based **chatbot** integrated with **PostgreSQL** and **RAG** for real-time querying of project documentation and user data, reducing manual lookup time by **40%** and enhancing team collaboration for a **Project Management SAAS** tool
- Established **ETL** and **CI/CD** pipelines for model retraining and data validation **(GitHub Actions, Docker)** and automated data ingestion from client systems via **RESTful APIs** reducing cycle time by **10%**

JP Morgan Chase & Co., Quant Analyst — *Apr 2022 – Apr 2024*

- Engineered an **Automated Trading System** on **AWS**, utilizing **Deep Reinforcement Learning (DRL)** for Asset Wealth Management. Built data pipelines for real-time market data ingestion and model retraining, boosting portfolio returns by **15%**
- Proposed an optimal **dynamic revenue model** using **XGBoost** for loans >$700k norms **to improve competitiveness** against peers

Crompton Greaves Power & Industrial Solutions ltd., Data Analyst — *Jul 2017 – Jul 2019*

- Conducted **demand forecasting** using **Random Forest Regressor** for export markets to capture seasonal demand variations

Education & Certifications

Year	Degree	Board / Institute	% / CGPA
2020-2022	PGDM (Analytics/Operations)	Goa Institute of Management	5.35/8
2013-2017	B. Tech (Mechanical)	Dayalbagh Educational Institute (D.E.I), Agra	88.3%
2012-2013	HSC (12th)	CBSE	88.6%
2010-2011	SSC (10th)	CBSE	10/10

- **Lean Six Sigma Green Belt certification**, SSA Business solutions, 2019

Academic Projects

MBA Summer Internship Project @ V-GUARD	• Conducted a pan India analysis on **E-Commerce** market (Amazon and Flipkart) for kitchen products **(size - INR 660+ cr.)** across Channels, Consumer behavior, Product trends and Competitor profile • Engineered product-preference features and applied **K-Means clustering** for segment customers into actionable groups

Skills

Category	Tools & Technologies
GenAI Tools & Frameworks	**Langchain, Langgraph, LlamaIndex, CrewAI, n8n, Streamlit, HuggingFace, Ollama, LLMs, Cursor AI**
Programming	**Python (scikit-learn, Pandas, NumPy), SQL, TensorFlow, PyTorch, Flask, FastAPI, JS, ReactJS**
Data Engineering/Analysis	**MLFlow, AWS (S3, EC2, Dynamo db, Lambda, ECS), Azure ML Studio, Alteryx, Tableau, PowerBI, SQL**

Achievements

- **Q3 Quarterly Award, JP Morgan** for **increasing revenue** of **$7.2Mn** and efficiency gain of **0.5 FTE** with new consumer pricing solution
