Total Experience: 07 Years 00 Months

Docusign, Data Scientist (Contract) *Sep 2025 – present*

- Built an **AI-driven QA enablement tool** (multi-agent **RAG**) using **CrewAI**, **FastAPI** and **GitHub Copilot / LLM-based tools** to auto-generate functional & regression test cases from **Jira** stories; implemented hybrid retrieval with **Azure AI Search** for high-fidelity scenarios.
- Developed a scalable **automation framework** with **JavaScript/TypeScript** + **Playwright** for UI flows and **Postman/GraphQL** for API testing; integrated **GitHub Actions** CI/CD and **JMeter** performance suites; shipped internal dashboards/utilities on **AWS** + **NextJS/ReactJS** with Zephyr Scale sync, cutting QA cycle time **60%**.

Ernst & Young LLP, Senior Consultant *Nov 2024 – Sep 2025*

Citibank **(Feb 2025 – Sep 2025)**

- Led **Agile** delivery of an **AI-powered QA/control validation** pipeline at Citibank using **Vertex AI** with **human-in-the-loop** and **PII** checks; packaged QA utilities in **Docker** and instrumented quality dashboards; improved validation accuracy **30%**.
- Built a RAG-based **QA reporting & release-insights utility** (Python, LlamaIndex) with **API test** evidence capture via **Postman** / **GraphQL** queries; automated regression packs and deployments using **GitHub Actions**, enabling **50%** faster audit-ready reports.

American Express **(Nov 2024 – Jan 2025)**

- Developed **customer spend** and **behavioral classification** models using GBM **(Python, XGBoost)**, contributing to **marketing mix** optimization efforts and risk-adjusted targeting strategies.
- Built proof-of-concept (PoC) for a **Customer Support Agent** using **LangGraph** and **RAG** frameworks to securely query customer complaint mails from **MongoDB**, categorize, generate response, validate and respond to the same

Brane Enterprises, Solution Leader *Apr 2024 – Sep 2024*

- Developed a **Langgraph ReACT** agent-based **chatbot** integrated with **PostgreSQL** and **RAG** for real-time querying of project documentation and user data, reducing manual lookup time by **40%** and enhancing team collaboration for a **Project Management SAAS** tool
- Established **ETL** and **CI/CD** pipelines for model retraining and data validation **(GitHub Actions, Docker)** and automated data ingestion from client systems via **RESTful APIs** reducing cycle time by **10%**

JP Morgan Chase & Co., Quant Analyst *Apr 2022 – Apr 2024*

- Engineered an **Automated Trading System** on **AWS**, utilizing **Deep Reinforcement Learning (DRL)** for Asset Wealth Management. Built data pipelines for real-time market data ingestion and model retraining, boosting portfolio returns by **15%**
- Delivered pricing analytics using **XGBoost** and automated model validation to support releases for loan norms >$700k.

Crompton Greaves Power & Industrial Solutions ltd., Data Analyst *Jul 2017 – Jul 2019*

- Conducted **demand forecasting** using **Random Forest Regressor** for export markets to capture seasonal demand variations

Education & Certifications

Year	Degree	Board / Institute	% / CGPA
2020-2022	PGDM (Analytics/Operations)	Goa Institute of Management	5.35/8
2013-2017	B. Tech (Mechanical)	Dayalbagh Educational Institute (D.E.I), Agra	88.3%
2012-2013	HSC (12th)	CBSE	88.6%
2010-2011	SSC (10th)	CBSE	10/10

- **Lean Six Sigma Green Belt certification**, SSA Business solutions, 2019

Academic Projects

MBA Summer Internship Project @ V-GUARD	• Conducted a pan India analysis on **E-Commerce** market (Amazon and Flipkart) for kitchen products **(size - INR 660+ cr.)** across Channels, Consumer behavior, Product trends and Competitor profile • Engineered product-preference features and applied **K-Means clustering** for segment customers into actionable groups

Skills

Category	Tools & Technologies
GenAI Tools & Frameworks	**LangChain, LangGraph, LlamaIndex, CrewAI, n8n, Streamlit, HuggingFace, Ollama, LLMs, Cursor AI, GitHub Copilot**
Programming	**Python (scikit-learn, Pandas, NumPy), JavaScript/TypeScript, SQL, Playwright, Flask, FastAPI, ReactJS**
Data Engineering/Analysis	**GitHub Actions, Postman, GraphQL, JMeter, Docker, PostgreSQL, MongoDB; MLFlow, AWS (S3, EC2,**

	DynamoDB, Lambda, ECS), Azure ML Studio, Alteryx, Tableau, PowerBI

Achievements

- **Q3 Quarterly Award, JP Morgan** for **increasing revenue** of **$7.2Mn** and efficiency gain of **0.5 FTE** with new consumer pricing solution
